

Soapberry Creative — Photos Needed

Content checklist for the website

Logo is already handled (embedded in **logos.js**); testimonials are text-only, no headshots needed. Everything below is currently a gray placeholder waiting on a real image.

1. Home — hero background

Full-bleed background behind “We build it. Then we feed it.” Wide/landscape, fills the whole screen. Cinematic, near-black/moody — a dark gradient overlay and white headline sit on top. Suggestion: a striking shot from a shoot day, or your best hero-style work image.

2. Work — 3 client project thumbnails (also reused on Home)

Client	Ratio	Tags shown
Maple Tree Films	4:3 (landscape)	Web design, Video, Copy
Cedar Grove School	3:4 (portrait)	Web design, Photography, Social
Bailey Carpentry PEC	4:3 (landscape)	Web design, Photography, Copy

Ideally a representative screenshot/photo from each actual project.

3. Services — 2 portrait images (4:5)

One next to the “Web design” offer — design/build work in progress. One next to the “Content creation” offer — a photo/video shoot in action.

4. Process — 1 portrait image (4:5)

Labeled “Behind the scenes” — a candid shot from an actual shoot day.

5. About — 1 portrait image (4:5)

Labeled “The studio” — a photo of you/the team or the workspace.

Total: 8 unique photos (1 hero + 3 project thumbnails + 2 service shots + 1 process shot + 1 about shot).

Once you have files, send me the paths and I'll wire each one into its MediaPlaceholder/WorkCard “src” prop in the corresponding page file.
